

2D.5 ~~Cross-Discipline Rankings~~ **Track Combined Competition**

2D.5.1 Track Combined Competition

1. The best finishers combined from *100 m, 400 m, 800 m, One Foot, Wheel Walk and IUF Slalom* ~~the 6 racing events listed above~~ will win this title.
2. *Placement p* Points are assigned for *a* placement in each of the above *disciplines* ~~raees~~, based upon *finals/final rankings* ~~best times in the final heats~~. ~~In smaller events, the finishing age group times in the IUF Slalom can be used if no additional final is run. The following system is used:~~ 1st place gets 8, 2nd place 5, 3rd place 3, 4th place 2, and 5th place 1 *point*. Highest total points score is the *Track Combined Champion* ~~World Champion~~; one each for male and female.
3. If there is a tie, the rider with the most first places wins. If this still results in a tie, the title goes to the better finisher in the 100 m race. ~~Points are not earned in age group heats.~~

2D.5.2 Event-specific Overall Ranking

1. *It is up to the organizers to determine from which disciplines placement points will be awarded for the Event-specific Overall Ranking.*
Note: The winner of this Event-specific Overall Ranking could be called for example the "Overall Winner of XY Cup".
2. *Placement points are assigned in the individual disciplines. Usually the following system is used: 1st place gets 8, 2nd place 5, 3rd place 3, 4th place 2, and 5th place 1 point. Highest total points score is the winner of the Event-specific Overall Ranking. Male and female should always be separated. There are two different ways of determining an overall ranking:*
 - 2.1 *As an age group combined overall ranking, points will be awarded for placements in the finals/final rankings, no points will be awarded in the age group rankings.*
 - 2.2 *As an age group separated overall ranking, points will be awarded for placements in the corresponding age group, no points will be awarded in the final races/final rankings.*
3. *If there is a tie, the rider with the most first places wins. If this still results in a tie, the title goes to the better finisher in the 100 m race or, if this race is not part of the disciplines, it should go to the better finisher of the next longer standard track race (according to 2B.2.2 - 2B.2.4). If there is no standard track race longer than 100 m, the organizers can use another predefined discipline as tiebreaker.*
4. *The choice of disciplines, the system to assign placement points and the tiebreaker discipline should be published at the same time as the registration form or earlier.*
